

Thursday 2nd July 2020

Good Morning Year 5

Maths:

LO: Calculating Angles around a Point

This lesson will introduce you to angles as a measure of turn.

Video link

<https://vimeo.com/432268054>

It is important to understand and identify **acute**, **obtuse** and **reflex** angles. You should be able to identify each type of angle within a 2D shape, as well as a stand-alone angle.

English:

Write your **Chapter 10: The night of the turtles**. Use the information you gained from Monday's research, as well as information from KK, to write about how you and your island character got to watch and help the turtles get into the sea. This will be quite a short chapter so challenge yourself to use a range of sentence openers (including verbs and prepositions) as you describe what you see and feel that eventful night.

Wider Curriculum- choose any of the additional tasks listed in the home learning grids.

Have a great day,

Mr Pritchard, Mr Wyke & Mrs Sparks
