

Easter Holiday Challenge!

Dear Year 1,

We have an exciting Easter Holiday challenge for you to complete! Earlier this term we started to look at different bridges and you had a go at building one out of materials we had in the classroom. During the holidays we would like to make your own bridge. You might like to draw your design and label it with the materials you will be using, just like you've done in school. We would then like to see you make your own river for the bridge to cross. You could make this by using collage materials, paint, fabric materials or any other ideas you might have. Then, you will need to make your bridge using junk modelling such as cardboard, insides of loo roll, lolly sticks, string, rolled up newspaper and anything else you might think of. We're going to be looking for some interesting models too! You might want

to try and make a bridge you already know about. Below are pictures of some famous bridges that you might recognise.

Golden Gate Bridge, San Francisco, California
Australia

Sydney Harbour Bridge, Sydney,

Tower Bridge, London, England

When you have built your bridge, we would like you to send a picture in to your class email address. You might want to measure your bridge. What is the length and height of your

bridge? You might like to see how steady your bridge is. How many Lego blocks can your bridge hold?

You have the whole holidays to do this project and you can send the photos to us until the end of the day on Friday 17th April.

Happy making!

Mrs Russell, Mrs Mill, Mrs Sweatman and Mrs Shortland
