

Maths - Thursday 2.7.20 Year 2

We would like you to order the months of the year and the days of the week. You can cut the words below up and stick them in the right order or you can write them out in the right order.

Then:

- Practice saying them off by heart in the right order.
- Can you now order them backwards?
- If this is too easy then learn to spell them all as well! (You should be able to spell most of them already.)
- Remember that days and months always start with a capital.

Days of the week	Months of the year	
		Saturday
April	September	May
Tuesday	December	January
August	Friday	November
February	Wednesday	Sunday
Monday	October	July
June	March	Thursday
